

ARINC and the Maryland Department of Veterans Affairs Presents

Cyber Industry Conference

For Maryland Veteran Owned Small Businesses

Cyber is in our Fiber

Cyber threats and concerns are not limited to any particular market of agency, but are found in every segment and level of modern society.

The Cyber Industry Conference for Maryland Veteran Owned Businesses aims to provide participants with an overview of “What is Cyber” and what cyber opportunities exist in the federal and commercial markets. Participants will hear from industry experts, educators, and think tanks. Panel topics will include the various components of cyber, from offensive and defensive cyber support tactics to areas of concern in the commercial, financial, telecommunication, health care, state, and federal markets, as well as opportunities for small businesses to provide unique and innovative solutions addressing those concerns. Additionally, participants will learn about specific cyber training programs within the Maryland education system. Representatives will also be on hand to discuss the availability of veteran’s education benefits that can be used to pursue and participate in these programs.

Event is open to the first 125 Veteran Owned Small Businesses
Registration fee: \$40
Sign-in, refreshments and networking begins at 8:00 a.m.

Register now at: http://www.arinc.com/cyber_conference
